Summary

Frontend Software Developer with 3.5+ years of experience building scalable, high-performance React and Next.js applications for B2B and B2C platforms. Strong expertise in component-based architecture (Atomic Design), state management (Redux, Context API), UI libraries (Ant Design, Material-UI), and performance optimisation. Proven track record of improving user engagement, UI consistency, and application performance across large-scale products.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Technologies/Frameworks: React.js, Next.js, Tailwind CSS, Bootstrap, Ant Design, Material-UI, Twig

Skills: UI Development, Responsive Design, React Router, Redux, Context API, Performance Optimization, Jest

Developer Tools: VS Code, Cursor AI, Figma, Adobe XD, Photoshop, Git/GitHub, Bitbucket, Jira

Experience

Extramarks (via Quarks)

Mar 2025 – Jan 2026

Software Engineer

Noida

- Developed **interactive and reusable React components** (progress tracking, conditional rendering, tab navigation) used across multiple course modules, **improving student engagement and personalisation**.
- Customized **Ant Design (AntD)** by extending and modifying components locally to match brand guidelines, **reducing UI inconsistencies by 30%** across learning applications.
- Optimized component rendering using **React hooks and memoization**, improving page performance and load times.
- Integrated **REST APIs** and implemented **multi-language support** for global users.
- Collaborated with **design, backend, and QA teams** to deliver features aligned with product requirements and sprint timelines.
- Ensured cross-browser compatibility and accessibility best practices**, delivering a consistent user experience across devices.
- Built and maintained **reusable UI patterns and shared components**, improving development efficiency and UI consistency across modules.

Publicis Sapient

Jan 2022 – August 2024

Associate Developer

Gurugram

- Led migration of frontend features from **Twig to React**, modernizing the stack and improving **maintainability, scalability, and performance**.
- Built and maintained **B2B/B2C React applications** on Spryker, implementing state management, API integrations, and modular UI components.
- Developed and tailored themes, components, and modules to **optimize user experience** and align with business requirements.
- Improved frontend performance and **reduced UI load failures by 25%** through optimized rendering and debugging using React DevTools.
- Proficient in frontend technologies, with expertise in React, for developing and enhancing **Magento-based web applications**.
- Followed **component-based architecture, Atomic Design principles**, and frontend best practices, ensuring scalable, modular, and maintainable frontend code.

Education

Master of Computer Application (MCA)

2020 - 2022

SRM Institute of Technology

Chennai

Bachelor of Computer Application (BCA)

2017 - 2020

Karim City College

Jamshedpur
